Senior Product Designer with **10+ years** of experience owning end-to-end product design across SaaS, enterprise, and startup environments. Designs **AI-powered products** in Figma, Figma Make, and Claude Design, then uses Claude Code to build **code-backed prototypes** that demonstrate real, high-fidelity functionality and shorten the gap between design and development. Owns every stage of the process, from research and conceiving through wireframes, prototypes, user testing, and handoff, with WCAG accessibility built in.

EXPERIENCE

Senior Designer & Project Manager · SeeSaw Labs

Aug 2024 – Sep 2026 · Chicago, IL (Remote)

- Owned end-to-end design of AI-powered products for internal operations and enterprise clients, from research through launch.
- Led discovery research and stakeholder interviews to define user needs, problems, and product requirements.
- Drove ideation and conceiving, validating directions quickly in Figma Make and Claude Design before high-fidelity work.
- Designed wireframes, high-fidelity prototypes, and design systems in Figma, keeping UX/UI cohesive and accessible.
- Built code-backed prototypes in Claude Code to show real functionality, then tested with users and handed off annotated specs.
- Managed design and delivery for cross-functional agile teams and mentored designers on AI-assisted workflows.

UX Strategist, New Projects · Slide UX (Contract)

Oct 2024 – Jul 2026 · Chicago, IL (Remote)

- Owned UX/UI design for new client engagements from discovery through final delivery.
- Conducted user and stakeholder research, turning findings into scoped design plans.
- Led information architecture, ideation, and wireframing to define structure and flows for websites and web apps.
- Built interactive prototypes in Figma, tested them with users, and refined designs based on feedback.
- Scoped and sold new engagements, carrying projects from the first discovery call through proposal and kickoff.

Senior Product Design Instructor · Flatiron School

Apr 2019 – Apr 2024 · Chicago, IL (Remote)

- Promoted from UX/UI Design Instructor (2019) to Senior (2021), designing and teaching product design and front-end curricula.
- Built and led a custom product design program for the U.S. Army Software Factory (2020–2021), training active-duty soldiers.
- Coached students and client teams through research, wireframing, prototyping, testing, and handoff.
- Ensured curricula and student work met WCAG accessibility standards.

UX/UI Designer · Strata Decision Technology

Jul 2017 – Apr 2019 · Chicago, IL

- Owned the design process for SaaS products turning healthcare big data into clear visualizations, often as the sole designer.
- Ran qualitative and quantitative research and delivered journey maps, wireframes, prototypes, and annotations.
- Initiated and led a company brand refresh and design system rollout.

UX/UI Designer in Residence · Designation Labs (Contract)

Dec 2016 – Jul 2017 · Chicago, IL

- Owned client and internal projects from scoping through handoff, including user research, IA, and prototype testing.

EDUCATION

Bachelor of Arts, Criminology and Justice Studies

Aug 2009 – May 2013

Kent State University
